GROWMATE EDU: Customer Personas

These four personas are hypotheses built from the target audience and public research. They are composites, not real people, and must be tested in the planned interviews with 10 teachers, 20 parents and 5 experts.

Persona 1. Ayesha, the Science Teacher (primary buyer)

Age and place	34, Karachi
Role	Biology and general science teacher at a private school
Goals	Run practical lessons, keep students interested, show results to the principal
Frustrations	Lessons are textbook heavy, no ready garden experiments, little time to prepare, no tool to track student progress
Behaviour	Uses WhatsApp, YouTube and school portals; asks the principal for small budgets
Where to reach her	Teacher WhatsApp groups, school visits, teacher workshops
What she needs from us	Ready lesson plans, worksheets, quizzes, a simple class dashboard
Likely objection	"Will this fit our syllabus and take extra time?"
Who decides to pay	Her principal, so she needs a short pitch to forward

> "I want students to learn by doing, but I do not have time to design every experiment."

Persona 2. Mr. Imran, the School Principal (decision maker)

Age and place	48, Karachi
Role	Principal of a mid sized private school

Goals	Stand out to parents, show modern teaching, stay within budget
Frustrations	Limited budget, many edtech sales pitches, worry about child data and screen time
Behaviour	Decides after seeing a pilot and hearing from other schools
Where to reach him	School owner networks, education events, referrals from other principals
What he needs from us	A free pilot, proof of student engagement, clear privacy and consent rules, a fair annual price
Likely objection	"Why should I pay when I already buy digital learning content?"

> "Show me it works in a school like mine before I spend money."

Persona 3. Sana, the Urban Parent (secondary buyer)

Age and place	36, Karachi, apartment with a balcony
Role	Working mother of two children, aged 8 and 11
Goals	Healthier family meals, a screen free weekend activity, teach children where food comes from
Frustrations	Does not know what grows in Karachi heat, confusing nutrition advice online, limited space
Behaviour	Active on Instagram, TikTok and parent WhatsApp groups; compares prices before paying
Where to reach her	Parent groups, short videos, school newsletters
What she needs from us	A simple balcony plan, easy recipes, quick nutrition tips, children's activities
Likely objection	"Is a monthly subscription worth it for gardening tips?"

> "I would try it if it tells me exactly what to plant on my balcony and what my kids should eat."

Persona 4. Hamza, the Nutrition and Agriculture Student (influencer and early user)

Age and place	21, Karachi
Role	University student in nutrition or agriculture
Goals	Learn food science with practice, build a portfolio, find internships
Frustrations	Theory heavy courses, scattered sources, no practical projects
Behaviour	Uses Instagram, LinkedIn and student societies; shares useful tools
Where to reach him	University societies, ambassador programmes, social media
What he needs from us	Food composition data, nutrient interaction explainers, experiments, a certificate
Likely objection	"Can I trust the information, and is there a free tier?"

> "If the science is accurate and sourced, I will recommend it to my class."

How the personas fit together

Persona	Role in the sale	Priority	First channel
Ayesha, teacher	User and champion	1	Teacher groups and school visits
Mr. Imran, principal	Pays	1	Pilot and referrals
Sana, parent	Second customer	2	WhatsApp groups and short videos

Persona	Role in the sale	Priority	First channel
Hamza, student	Early adopter, spreads the word	3	University societies

What to validate next

1. Do teachers have time and budget to run garden experiments?
2. Would principals pay PKR 150,000 a year, and who in the school signs off?
3. Would parents pay PKR 499 a month, or only for a school linked plan?
4. Do students trust AI nutrition answers if experts review them?

All prices are team assumptions and must be tested with real customers.
